

Connecting Android Devices to the Wireless

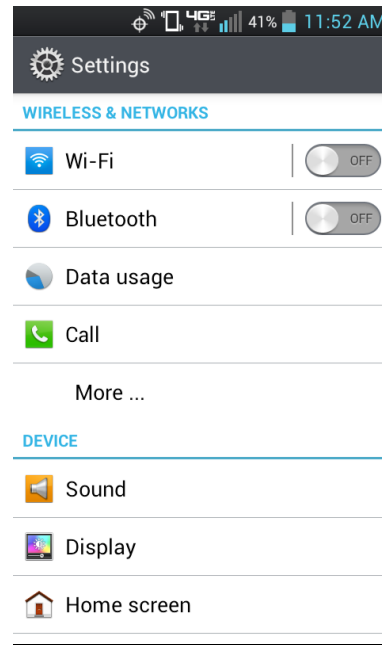

Step #1:

Navigate to Setting.

Then select Wi-Fi.

Note: Make sure Wi-Fi is set to ON.

Step # 2:

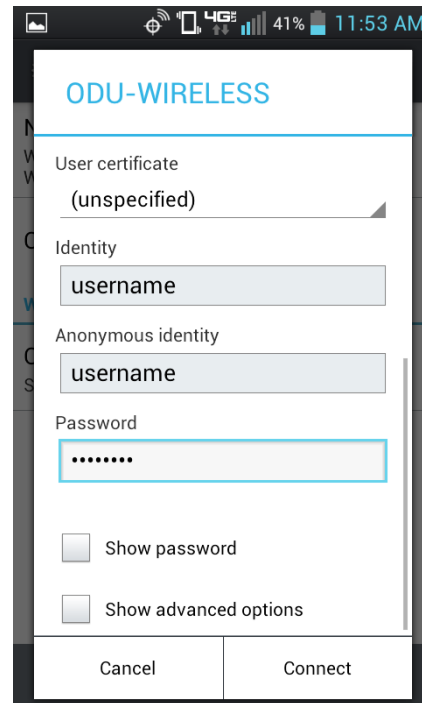

Select ODU Wireless.

Note: If you have previously used ODU Wireless and have recently changed your password, you must hold down your finger on ODU Wireless and select “Forget Network”

Step # 3:

You will need to enter your username in the **Identity** and **Anonymous identity** fields and your password in the **password** field. Click **Connect**.

Step #4:

Next you will need to open up your web browser and refresh the page; it will take you to the Bradford registration page. You will need to enter your username and password in the specified areas and then click on download.

Note: No software is downloaded to your phone.

Step #5

The last step, after you enter you username and password, your web browser will refresh and will say successful. You will need to restart the device. After the restart it should be connected to the wireless internet.
